Objective

Dedicated and detail-oriented recent graduate with a Bachelor's degree in Computer Engineering seeking a challenging position in IT industry. Adept at leveraging programming skills to develop and implement efficient and innovative software solutions. Eager to contribute my technical skills, passion for coding, and commitment to quality to a dynamic team in a growth-oriented organization.

Education

B.E Computer Science | Smt. Kashibai Navale College of Engineering

Pune | 2019 -2023

- University: Savitribai Phule Pune University.
- Cumulative GPA : 8.08/10.

Skills

- **Programming & Development :**
C++, Java, Python, PHP, HTML, CSS, JavaScript, Bootstrap, MySQL, React.js, Node.js, git, GitHub
- **Soft Skills :**
Adaptability, Teamwork, Problem Solving, Efficient decision making

Internship/Trainings

E&ICT Full-Stack Development

7 Aug 2021 - 9 Sep 2021

- Intensive program covering full-stack web development with a focus on PHP.
- Skills acquired include PHP, front-end technologies (HTML, CSS, JavaScript, Bootstrap), database integration, and web security.
- Practical projects and industry-relevant knowledge for web development careers.
- Applied skills in real-world projects
- Enhance proficiency in PHP and full-stack development.

Innomatics Research Labs Full-Stack Development

22 Feb 2023 - 27 April 2023

- Comprehensive training program covering full-stack web development.
- In-depth learning of front-end technologies (HTML, CSS, JavaScript) and back-end frameworks (Node.js), front-end JavaScript library (React.js).
- Database integration, RESTful API development, and deployment strategies.
- Hands-on projects and real-world application development.
- Focus on industry-relevant skills for web and application development.

Projects

Blog App:

 [Link](#)

- Developed a responsive blog application using the MERN stack.
- Implemented user authentication for secure post creation, modification and deletion
- Designed and implemented CRUD operations for managing blog posts utilizing MongoDB for database storage
- Created a dynamic and responsive user interface using React.js for frontend development.

Sales Transaction Dashboard:

 [Link](#)

- Created a dynamic web application using the MERN stack to display and analyze product transactions.
- Integrated a third-party API for initial database seeding, ensuring efficient data management and retrieval.
- Built comprehensive APIs for listing transactions with search and pagination, calculating monthly sales statistics, and generating data visualizations like bar and pie charts.
- Developed an intuitive user interface to view and search transactions, display sales statistics, and present data insights through interactive charts.

3D Shoe Customizer:

 [Link](#)

- Developed an interactive 3D shoe customizer web application using Three.js and Three Fiber.
- Created intuitive user controls for modifying shoe colors, lace colors, textures, and design elements.
- Utilized Three Fiber (React Three Fiber) to seamlessly integrate Three.js with the React.js framework for efficient state management and component-based architecture.

Certificates

Oracle Cloud Infrastructure 2023 Foundations

30 Sep 2023

Issued by: Oracle University

- Successfully earned the Oracle Cloud Infrastructure Foundation Certificate, demonstrating proficiency in foundational concepts of Oracle Cloud Infrastructure.
- Key skills covered:
 - Basic Cloud concepts
 - Storage
 - Networking
 - Database
 - Cost management and governance and administration
- Expiration date: 30 September 2025
